Profile

A passionate front-end developer with expertise in building projects using HTML, CSS, JavaScript, ReactJS, Tailwind and Bootstrap. I am highly motivated to take on challenging positions and continuously expand my knowledge by embracing new technologies. Eager to continue learning and thrive in both individual and collaborative environments.

Projects

SEARCH YOUR BOOKS

- Consume API from Google Books.
- Designed the UI with an easy understanding.
- Utilized modern web development technologies, including HTML, CSS, JavaScript, React and API integration techniques.

GROWPLANT HOME PAGE

- Conceptualized and designed an eye-catching landing page with a focus on creating an appealing look.
- Incorporated smooth animations throughout the page to create a seamless browsing experience.

CAFETERIA LANDING PAGE DEVELOPMENT

- Integrated a shopping cart feature that enables users to review their selected products, delete items or add more), and proceed to checkout.
- Developed the landing page from scratch using TailwindCSS, leveraging its utility-first approach to create a responsive and visually consistent design.

SEARCH YOUR MOVIE

- Implemented an API integration from OMDb to consume movie data, allowing users to search for any available movie.
- Designed and developed a user-friendly website from scratch.
- Created a dynamic interface that displays movie posters, descriptions, actors, and ratings for the searched movies.

INTERACTIVE MUSIC PLAYER

- Implemented essential playback functionalities, including the ability to skip, stop, pause, move forward or backward within a song, and repeat functionality.
- Developed with vanilla JavaScript.

BOOTSTRAP SIMPLE PORTFOLIO

- Implemented Bootstrap framework to enhance the design and functionality of the website.
- Developed the project using vanilla JavaScript, leveraging its capabilities to add interactivity and dynamic elements to the website
